

Self Paying Fees for Operations

IMPORTANT:

Please read the following information carefully as it will impact on the cost of your procedure

Please find below The London Orthopaedic Clinic's surgical fees for a selection of our top operations. These prices are based on WPA rates and are fixed for all of our consultants.

It is important to note that The London Orthopaedic Clinic is not a hospital and therefore we are unable to provide the fees for a number of services that may be required in addition to the surgical fees for your procedure. Please note that it is likely that your operation will be inclusive of the following which will be at an additional cost to you.

- Initial consultation
- Follow up appointment
- Any diagnostics including MRI, X-ray or Ultrasound
- Phlebotomy
- Wounds, plaster or dressings
- Hospital fees
- Anaesthetists fees

Due to the nature of operations there may be complications that arise and therefore prices may increase based on the complexity of your case. Your individual case and any potential complications will be discussed with you in depth before your operation with your consultant. If you have any queries at this point regarding pricing, please ask your consultants PA's for full quotation for your individual operation.

For more information regarding prices of services offered at The London Orthopaedic Clinic, [please download our Self Paying Fees for Services PDF.](#)
